

Geology-English-Session1-2021-Prac

Question	Answer
1	diversity of living organisms.
2	rotation of the outer core around the inner core
3	stalactite and stalagmite
4	Mediterranean Sea.
5	A harmful , B useful
6	1.st and 2.nd trophic level.
7	not formed in nature
8	triclinic
9	textile factories.
10	Gravels.
11	80°
12	calcite.
13	graben.
14	folds
15	crustaceans
16	2.5 liters of water from Arabian gulf.

17	99%
18	Algae , Aloe
19	Man depends on it but has nothing to do with its existence.
20	affected by heat and have attractive colours.
21	Calcium - Iron
22	Chemical weathering by oxidation
23	convergence of plates forming Andes mountain.
24	graben
25	fault - calcite
26	Coarse grains of amphibole, calcium-rich plagioclase and pyroxene
27	coastal endings and meanders
28	Have the same age and uplifting movements occurred in section (1)
29	planting potato for many sequence years.
30	pyrite.
31	2500 microns
32	Pillows.
33	Kaolinite form granite.

34	Himalaya
35	30°
36	Black sand
37	transported
38	0.1 %
39	Leave its seeds in soil in winter.
40	Graphite.
41	shallow and normal salinity
42	slow tectonic movement
43	dolerite - diorite - microgranite.
44	shale then slate
45	fixed algae
46	Meanders
47	C and D
48	Solar and wind energy
49	erosion of soil
50	hydrocarbon substance.
